Flow in Human-Computer Interaction

15 Items

5 Dimensions

The following questions ask about your feelings while using computers. Please describe a typical (work-related) computer session by placing check marks on the scales given below.

Enjoyment
Interesting - Uninteresting (9-point with endpoints)
Fun - Not fun (9-point with endpoints)
Exciting - Dull (9-point with endpoints)
Enjoyable -Not enjoyable (9-point with endpoints)

Concentration
Am deeply engrossed in activity - Not deeply engrossed (9-point with endpoints)
Am absorbed intensely in activity - Not absorbed intensely (9-point with endpoints)
Attention is focused on activity - Attention not focused (9-point with endpoints)
Concentrate fully on activity - Do not fully concentrate (9-point with endpoints)

Control
Clearly know the right things to do - Feel confused about what to do experiment with output (9-point with endpoints)
Feel calm - Feel agitated (9-point with endpoints)
Feel in control - Do not feel in control (9-point with endpoints)

Exploratory use
Experiment with commands - Do not experiment (9-point with endpoints)
Try out new commands - Do not try new commands (9-point with endpoints)
Experiment with output formats - Do not experiment with output (9-point with endpoints)

Challenge
Overall how challenging do you find the use of computers?
low - high (9-point with endpoints)

Cronbachs $\alpha = .na$
