

## Survey for Determining Students' Levels of Satisfaction

Bohigas, X. (2011). Evaluation by university students of the use of applets for learning physics. *Journal of Educational Multimedia and Hypermedia*, 20(3), 235-245.

5 Items

Dimensions are not defined

I've had connection problems

I've found it very boring

It's helped me to understand the behaviour of charged particles under the action of electrical and magnetic fields

It wasn't necessary to do it in order to learn about the action of fields on charged particles

I think it would be a very good idea to carry out similar activities in other areas of the subject.

5-point Likert Scale (5 =complete agreement, 4 ="agreement", 3 = neutral response, 2 = "general disagreement" 1 =complete disagreement")

**Cronbach alpha: na**
